GUIDE LINE FOR CI MINI PROJECT (3-4 students/group:):

****

Implementation

-Find a problem (real problem data or data from any sources/open datasets (ie: uci, weka,kaggle))

-Select suitable algorithm: MLP/BP, DEEP LEARNING ALGORITHMS, K-MEAN, FL, PSO AND GA

-Implement/Run Experiment/ Record the experimental result and analysis

-Submit:

a) Declaration page-abstract

b) Report on your project

- Project overview

-explain problem background

-why selects the algorithm

- development step (user manual)

-interface print screen

c) Source code (c++, weka,matlab, python.....) + flowchart + pseudo code

Summarize your work by writing an article paper (use Springer/IJIC FORMAT). The description in a paper publication format should consist of:

i. Title and affiliation
ii. Abstract
iii. Background
iv. Methodology
v. Result and Discussion
vi. Conclusion and Reference

Project Leader should submit 1-page report on meeting activities and delegation of works, to be signed by all members.

The softcopy

i.Paper Publication Format
ii. Solution Coding
iii. SlidePresentation

must be uploaded on e-learning with your **ShortMembersName** as a filename.

PROPOSAL DATELINE: 13 APRIL 2023

FINAL PROJECT DATELINE: 17 JUNE 2023

FINAL PROJECT PRESENTATION: 24 JUNE 2023
